Continuously upgraded under her current ownership "JASALI" offers the most successful combination of performance under both sail and power.

This well-built and immaculate yacht offers flexible accommodation for twelve, plus superb saloon and deck areas, which are genuinely better than on many motor yachts.

The hydraulic swimming platform doubles as a dock for the tenders and gives easy access to and from the water.

For 2002, JASALI has new sails and mostly new rigging. The equipment on board, including all her impressive water sports facilities, is continuously upgraded to ensure that guests cruising on JASALI have the very best choice and quality.

Maintained to the highest standards, JASALI benefits from a keen, stable and caring crew.
